PRESIDENT'S MESSAGE

Junior Doctors' Association, Pt. JNM Medical College has always been an inseparable part of the college ever since its inception. It has served to establish effective communication between junior doctors and authorities. With the motto of "Health for all", JDA works towards ensuring a healthy work environment for junior doctors and healthcare staff and has been at the forefront of promoting a congenial environment for medical education for both undergraduate and specialty training in the State. JDA also conducts various social programmes to promote Health among the general public and regularly conducts various drives and IEC activities. We firmly believe in the importance of standing together in times of need and supporting each other for the common good.

DR. PREM CHOUDHARY
PRESIDENT

GENERAL SECRETARY'S MESSAGE

It is the spirit of collective participation and effort that forms the driving force of all activities of the JDA. The past three years with the devastating Covid pandemic have further highlighted the need for a robust healthcare structure to meet the demands of the growing population and emerging medical challenges. Junior Doctors being the torch-bearers of healthcare have always been at the forefront of constructive initiatives and JDA has served as an optimum platform to channelize these positive energies. JDA has conducted various activities like blood donation camps, marathons for health, deaddiction campaigns and other IEC activities to promote health both in the medical fraternity as well as the general public. It is our honour that JDA holds the record of **single-day largest voluntary blood donation** in the history of the institution with a majority of donors being young doctors. The commitment of junior doctors of our nation begets great news for the future of healthcare in our country and I have been honoured to have contributed to it albeit in a small way.

The current secretariat of JDA is located at JDA Office, Ground floor, New PG Boys' Hostel within the College campus and office bearers are available 24x7 to extend their help in all possible ways.

GENERAL SECRETARY
DR. AMAN AGRAWAL
